SUMMARY

5 years of software development. I build systems end to end: architecture, back end, web, mobile (React Native), servers and network. Built enterprise systems at İGDAŞ and BELBİM. Founder of Eribitech: a three-product microservice platform.

EXPERIENCE

BELBİM Elektronik Para ve Ödeme Hizmetleri · Software Development Specialist — Jul 2025 – Present

- Built the headless CMS: modular monolith, Clean Architecture.
- Built belbim.istanbul and istanbulkart.istanbul: Next.js 15, SSG/ISR, TR/EN.
- Configured Next.js on the servers.
- İstanbulkart mobile back end: version-based content synchronization. RabbitMQ, Redis, Hangfire.
- İstanbulkart mobile app (React Native): connected the integrations and built the updates. TanStack Query.
- FluentValidation, LDAP / Active Directory. Now building the DevOps system.

Eribitech · Founder — 2025 – Present

- Built Eribi: e-commerce, Eribi Growth, Eribi Creative. Three products, one platform.
- Microservice architecture: 9 services behind a YARP API gateway. .NET 8, Next.js, TanStack Query.
- Multi-tenant: database per tenant, automated store setup (DNS, SSL, IIS).
- Payment, e-invoice, shipping, marketplace and ERP integrations.
- Migrated from SQL Server to PostgreSQL 17. Idle memory cut from 72% to 60%.
- Set up the test and production servers: Windows Server, IIS, Cloudflare. 100+ GitHub Actions workflows.

İGDAŞ · Software Developer — Dec 2023 – Jul 2025

- Built the Operations Automation System that field teams use 24/7.
- State-machine workflows, rule-based scheduling, consistent inventory flows.
- SAP S/4HANA integration: sync, validation, retries, failure recovery.
- Built the Medical Supply Tracking (TMT) app: infirmary appointments, supply tracking.
- Active Directory authentication. Data-heavy SQL reports. KVKK audit.

Tiramisu Studios · Game Developer — Dec 2022 – Jul 2023

- Drift Max Pro (120M+ downloads) and Drift Max City (25M+ downloads): Unity, C#.
- Traffic system with object pooling. Unity editor tools. Less GPU load with occlusion culling.

Perspactive Studios · Founder — Mar 2021 – Sep 2022

- Built and led a game team of 10+. Unity, C#.

SKILLS

Back end: C#, .NET 8, ASP.NET Core, EF Core, Hangfire, RabbitMQ, Redis, FluentValidation
Architecture: Microservices, modular monolith, Clean Architecture, YARP, Umbraco (headless), state machines
Mobile and web: React Native, Expo, React, Next.js, TypeScript, TanStack Query, Tailwind CSS
Data: SQL Server (T-SQL), PostgreSQL, Redis
DevOps: GitHub Actions, IIS, Windows Server, Cloudflare, PowerShell, PM2, network configuration
Integrations: SAP S/4HANA, Active Directory / LDAP, payment, e-invoice, shipping, marketplaces, ERP
Testing and tools: xUnit, Moq, FluentAssertions, Vitest, Git, Claude Code

EDUCATION AND LANGUAGES

Bahçeşehir University · BSc Computer Engineering (English-medium) — 2017 – 2022

Certificate: C# and ASP.NET Core MVC, 260 h (2024). Turkish (native) · English (professional).
